Our Lifestyle Options

It's your choice...

Today's seniors are all different. One size does not fit all. That's why we offer a comprehensive spectrum of personal care. Whether you need full time watchful care in a residential community, just a short recuperative respite stay, or specialized memory services, we have solutions to all your senior care challenges.

Residential Care

Every detail of our community, from the flowers in our gardens to the warm, inviting colors that grace our interiors, has been carefully selected to assure that our residents thrive in mind, body and soul. Our suites offer privacy, comfort, and spacious rooms for personal treasures—all just steps away from the social hub of community living areas. Thoughtful design, coupled with exceptional service and a diverse menu of daily activities, create a nurturing and stimulating environment.

Respite/Short-Term Care

Sustaining the 24/7 demands of caring for a loved one requires balance and self care. Often following hospital stays or an illness, seniors need convalescence and families can safely bridge the gap and speed recovery with respite services. In addition, there will also be times when families need to travel, attend to personal needs, or simply take a break to recharge their batteries. We offer comfortably furnished suites, round the clock attention and full access to all the benefits of our compassionate community.

Memory Care

The Season's Memory Care environment has been purposefully and specially designed to aid those who have cognitive challenges caused by memory impairment, dementia and Alzheimer's. Our safe, 11-bed community features secure entry and exit doors, memory boxes at each suite entrance to help cue residents with visual reminders, and 24-hour monitored emergency response system. Large windows, a welcoming porch and garden with gazebo ensure residents get plenty of natural sunlight which helps reduce anxiety among residents as they transition gradually from day to evening.
